1. Introduction

NAKANISHI INC. (hereinafter referred to "NSK") promotes environmental activities based on our management policy of reducing the environmental impact of all our business activities, including research and development, manufacturing, sales, and service of ultra-high speed rotary equipment and realizing a healthy and prosperous society in harmony with nature.

NSK has established the Environmental Policy, and we are uniting our efforts to give consideration to the environment through all our products and activities in all business processes.

Based on this concept, we have clarified medium- to long-term targets and managed specific activity items and target values.

Among them, there is a wide range of issues that we must address, and we need to comprehensively assess the environmental impact of our products throughout their entire life cycle, from the "manufacturing" stage to the "use" stage, and then to the "reuse" and "return" stages as resources after the products have fulfilled their roles.

NSK promotes green procurement as one of our efforts at the "manufacturing" stage.

Green procurement refers to the procurement of products, parts, and materials with less environmental impact from suppliers who actively promote environmental conservation. In order to promote business activities that reduce the environmental impact and risks of hazardous chemical substances, it is necessary to carry out activities throughout the entire supply chain, and the cooperation of our business partners is essential.

We would like to ask our suppliers to understand and cooperate in green procurement for the creation of a sustainable society.

2. Purpose and Scope of Application

2-1 Purpose of Green Procurement

As various environmental issues such as global warming, resource depletion, and the destruction of ecosystems become more serious, demands and expectations for companies to reduce their environmental impact are increasing.

NSK contributes to the realization of a sustainable society by promoting manufacturing with the aim of reducing the environmental impact of our products throughout their life cycles through all business activities, including research and development, manufacturing, sales, and service.

As part of these activities, green procurement aims to procure products and services that have less environmental impact from suppliers who are actively engaged in environmental conservation activities, taking into account the proper use of chemical substances, conservation of ecosystems, energy conservation, resource conservation, and ease of recycling, decomposition, and disposal.

2-2 Scope of Green Procurement

This applies to the following delivered products.

Products (finished and semi-finished products)

Parts (electrical/electronic parts, mechanical parts, others)

Materials (metals, resins, others)

Subsidiary materials (adhesive, silicon, paint, ink, solder, others)

Packaging materials, printed materials (trays, bags, cushioning materials, tapes, printing ink, others)

3 Requirements of Green Procurement

In order to promote green procurement, NSK asks all of our suppliers to understand green procurement and cooperate with the following two things.

- To actively engage in environmental conservation activities
- To deliver products and materials with reduced environmental impact to NSK

Specifically, please check the following "Requests to suppliers" and "Reduction of environmental impact and management of chemical substances in delivered products" .

3-1 Requests to suppliers

- Compliance with environmental laws and regulations
- Establishment of environmental management system (EMS) and drafting, implementation, and operation of action plans

We believe that obtaining Eco Action 21 and international environmental certifications such as ISO 14001 is an effective way to operate EMS efficiently.

Therefore we recommend that our suppliers actively obtain and maintain these environmental certifications.

- Promotion of continuous improvement activities such as energy and resource conservation and the 3Rs (reduce, reuse and recycle).
- Establishment of a system for properly managing chemical substances contained in delivered products

We will confirm the above requests using the “Supplier Environmental Audit Check Sheet” in Table 1 when we start business with suppliers.

If necessary, we will confirm them when we conduct on-site audits of our suppliers.

3-2 Reduction of environmental impact and management of chemical substances in delivered products

① Reduction of environmental impact

Regarding products delivered to NSK, please follow the items below to improve environmental performance.

We would also like to ask our suppliers for the same consideration when procuring raw materials and parts.

- Reduction of CO² emissions
 - Reduction of industrial waste generation
 - Proper use of chemical substances
 - Provision of environmental information on products and materials
- Although we do not request data on a regular basis, we will check the status of promotion when visiting our suppliers through on-site audits.

② Information management of chemical substances

With the support of our suppliers, NSK delivers environmentally friendly products to society. We would like to ask our suppliers in the upper stream of the supply chain to cooperate in the survey.

In consideration of customer requirements and laws and regulations related to medical devices, we divide the chemical substances to be controlled into two categories: "Prohibited Substances" and "Controlled Substances" to compile information on chemical substances contained in delivered products.

- Prohibited Substances: See Table 2
- Controlled Substances: See Table 3

In addition, we may ask our suppliers to understand and cooperate with the survey chemical substances used in the manufacturing, storage, and transportation phases until delivery, even if they are not finally contained in the delivered products.

③ Survey on chemical substance contained in products

NSK asks our suppliers for environmental considerations. Regarding chemical substances contained in products, we require our supplier to guarantee the non-inclusion of chemical substances.

If non-inclusion of chemical substances in products is indicated as a condition of purchase specifications, we request our supplier to submit the "non-use warranty" in Table 5 and chemSHERPA (A1) sheet.

"Non-inclusion" refers to the case where it has been clarified by reasonable procedures that the chemical substance is not contained or is below a predetermined threshold value in the homogeneous material, regardless of "intentional addition" or "unintentional contamination of impurities" .

a) Materials and data to be submitted

With regard to the formats for managing chemical substances contained in products, NSK is working to respond flexibly to the formats widely adopted by industry, with the first priority on the usability of our suppliers.

At present, we use the following formats as the basis for input.

<Survey format>

chemSHERPA(AI) sheet, non-use warranty

* The submission is based on the chemSHERPA (AI) sheet.

However, if it is difficult to submit the chemSHERPA (AI) sheet due to a lack of an environment in which our suppliers can respond, the submission may be made using the "NSK Prohibited/Controlled Substances Investigation Sheet" .

* chemSHERPA : This is the format for transferring information on chemical substances contained in products provided by JAMP. chemSHERPA-AI is a survey format that deals with chemical substances contained in articles.

* Information such as SDS (Safety Data Sheet) and parts mass may be requested as necessary.

b) Non-use warranty

For "Prohibited Substances" in Table 2, please submit "Non-use Warranty" in Table 5 (distributed at the time of request for investigation).

In addition, please submit "Non-use Warranty" in Table 5, including information that can identify the product, such as the product name and product number, to be reported.

3-3 Guidelines for managing information on chemical substances contained in products

As the use of "Prohibited Substances" is basically banned by laws and regulations in Japan and abroad, it is necessary to guarantee "non-inclusion" from the viewpoint of legal compliance.

Regarding "Controlled Substances", it is necessary to appropriately manage the content information regardless of whether or not the chemical substances are contained in products.

3-4 In the event of a change in the chemical substance content information

In the event of any new inclusion in the delivered products or any change in the reported contents of the delivered products for any reason, please contact us immediately.

4. Revision of Green Procurement Guidelines

These Guidelines may be revised as follows. In that case, we will promptly notify our suppliers by e-mail or in writing.

- Change in laws, regulations, or customer requirements
- For parts that have been reported once, our Purchasing Department will inform our suppliers of the content of each change in the event of any change in the "Prohibited Substances" or "Controlled Substances" due to the revision of the law.

Based on the content, please use the specified form to answer the status of inclusion.

■RoHS exemption

The RoHS Directive stipulates "exempted uses" that permit the inclusion of prohibited substances for use that cannot be technically substituted.

The revised RoHS Directive (2011/65/EU: RoHS2) has two types of lists: AnnexIII and AnnexIV.

Please check the latest lists and strictly observe that prohibited substances do not contain more than the allowable amount.

Content Survey Form of NSK Prohibited/ Controlled Chemical Substances

Please survey the content of NSK prohibited/ controlled chemical substances for the following parts.

※ If any prohibited/ controlled substances are contained, please fill in the form below regardless of the standard value.

※ If the case falls under the category of exemption of the RoHS Directive, please enter the exemption code in the comment column

※ If any prohibited/ controlled substances are contained, please put them into columns from "Substance 1" to "Substance 5" below.

* If there are five or more prohibited/ controlled substances, please make a copy of the form and fill in the copies.

We hereby certify that all parts and products that we deliver to NSK use no prohibited substance, defined below, if any, below the threshold, or exempt in accordance with NSK Procurement Guidelines.

NSK Prohibited Substances

No	化 学 物 質 名 Chemicals name	Substance Name	CAS No	含有濃度の閾値[Threshold level]
1	カドミウム及びその化合物	Cadmium and its compounds	-	100ppm以下 (100ppm or less)
2	鉛およびその化合物	Lead and its compounds	-	1000ppm以下 (1000ppm or less)
3	水銀及びその化合物	Mercury and its compounds	-	1000ppm以下 (1000ppm or less)
4	六価クロム化合物	Hexavalent chromium compounds	-	1000ppm以下 (1000ppm or less)
5	ポリ臭化ビフェニール類(PBB類)	Polybrominated biphenyls (PBBs)	-	1000ppm以下 (1000ppm or less)
6	ポリ臭化ジフェニルエーテル類(PBDE類)	Polybrominated diphenyl ethers (PBDEs)	-	1000ppm以下 (1000ppm or less)
7	フタル酸-2-エチルヘキシル(DEHP)	Bis (2-ethylhexyl) phthalate	-	1000ppm以下 (1000ppm or less) カテゴリー8と9は除く(Category 8 and 9 are removed.)
8	フタル酸ブチルベンジル(BBP)	Butyl benzyl phthalate	-	1000ppm以下 (1000ppm or less) カテゴリー8と9は除く(Category 8 and 9 are removed.)
9	フタル酸ジブチル(DBP)	Dibutyl phthalate	-	1000ppm以下 (1000ppm or less) カテゴリー8と9は除く(Category 8 and 9 are removed.)
10	フタル酸ジイソブチル(DIBP)	Diisobutyl phthalate	-	1000ppm以下 (1000ppm or less) カテゴリー8と9は除く(Category 8 and 9 are removed.)

■RoHS exemption

The RoHS Directive stipulates "exempted uses" that permit the inclusion of prohibited substances for use that cannot be technically substituted.

The revised RoHS Directive (2011/65/EU: RoHS2) has two types of lists: AnnexIII and AnnexIV.

Please check the latest lists and strictly observe that prohibited substances do not contain more than the allowable amount.

11	アスベスト類	Asbestos	-	意図的な使用禁止かつ、1000ppm以下 Intentional use is prohibited, however, 1000ppm or less as tin
12	有機錫化合物:トリブチル錫類(TBT)、トリフェニル錫類(TPT)、	Tributyl Tin (TBT) and Triphenyl Tin (TPT)	-	意図的な使用禁止 かつ、スズとして 1000ppm以下 Intentional use is prohibited, however, 1000ppm or less as tin
13	ジブチルスズ化合物(DBT類)、ジオクチルスズ化合物(DOT類)	Di butyltin (DBT) compounds Di octyltin (DOT) compounds	-	スズとして1000ppm 以下 1000ppm or less as tin
14	有機錫化合物:酸化トリブチル錫類(TBTO)	Bis(tributyltin)oxide (TBTO)	56-35-9	意図的な使用禁止 Intentional use is prohibited
15	デカ-BDE	Deca-BDE	1163-19-5	-
16	ポリ塩化ビフェニール類(PCB類)	Polychlorinated Biphenyls (PCBs)	-	意図的な使用禁止 Intentional use is prohibited
17	ポリ塩化ターフェニル類(PCT類)	Polychlorinated Terphenyls (PCTs)	61788-33-8	意図的な使用禁止 Intentional use is prohibited
18	ポリ塩化ナフタレン類(塩素数が2以上)	Polychlorinated naphthalenes (more than 2 chlorine atoms)	-	意図的な使用禁止 Intentional use is prohibited
19	短鎖型塩化パラフィン	Alkanes, C10-13, chloro	-	意図的な使用禁止 Intentional use is prohibited
20	特定アミンを生成するアゾ染料・顔料	Azocoumarants and azodyes which form certain aromatic amines	-	意図的な使用禁止 Intentional use is prohibited
21	オゾン層破壊物質(HCFCを除く)	Ozone Depleting Substances	-	意図的な使用禁止 Intentional use is prohibited
22	PFOS(パーグロオクタンスルホン酸)、PFOA(ヘルフルオオクタン酸)	Perfluorooctane sulfonates、 Perfluorooctanoic acid	-	意図的な使用禁止 Intentional use is prohibited
23	フッ素系温室効果ガス(HFC、PFC、SF6)	Fluorinated greenhouse gases (PFC, SF6, HFC)	-	意図的な使用禁止 Intentional use is prohibited
24	HCB(ヘキサクロロベンゼン)	Hexachlorobenzene	-	意図的な使用禁止 Intentional use is prohibited
25	放射性物質	Radioactive substances	-	意図的な使用禁止 Intentional use is prohibited
26	特定ベンゼントリアゾール (第一種特定化学物質)	Specified benzotriazole	3846-71-7	意図的な使用禁止 Intentional use is prohibited
27	ジメチルフマレート(DMF)	Dimethyl fumarate	624-49-7	1000ppm以下 (1000ppm or less as tin)
28	ホルムアルデヒド	Formaldehyde	50-00-0	意図的な使用禁止 Intentional use is prohibited
